EXPERIENCE

University of Massachusetts Amherst – Hotel UMass Amherst, MA
Front Desk Associate May 2026 – Present

- Coordinate across housekeeping, events, and operations teams in real time, managing service requests for **50+** daily guests during high-occupancy conference periods.
- Perform nightly financial audit reconciling all transactions and authorizing charges, maintaining end-of-day financial accuracy across all accounts.

The Aga Khan University Karachi, Pakistan
Grant Administrator Aug 2024 – Jan 2025

- Administered high-value grants including the annual **\$1.5M** CHAMPS project, overseeing KPIs, burn rates, and staffing.
- Supported **10+** grant applications by drafting budgets, managing documentation, and coordinating the full pre-award process.
- Secured four awarded projects and served as the liaison for AKU on all administrative and partner-facing matters.
- Regularly analyzed department-level data of more than **50** active projects for reporting to internal leadership and global agencies, supporting decision-making and maintaining accountability across research activities.

Chevron Lubricants Pakistan Karachi, Pakistan
Commercial Sales Intern July to Aug 2023

- Analyzed nationwide sales data for two lubricant products on excel, identifying peak sales months and key regional trends.
- Proposed **18** targeted sales promotions validated by financial projections and past data aimed at increasing sales by **10%**.
- Conducted **20+** on-site surveys to generate insights on engine oil preferences, improving customer satisfaction.

DuPont Pakistan Karachi, Pakistan
Product Development Intern June to July 2022

- Uncovered counterfeit Hazmat suits—an essential import—via mystery shopping, strengthening the product's integrity.
- Secured a **\$10,000** CSR project by evaluating NGOs and leading a proposal to support hearing-impaired students in Karachi.
- Conducted market research on a semiconductor business opportunity for potential entry into Pakistan.

REPORTS AND PROJECTS

Interactive City Comparison Dashboard: "Life After Isenberg" Amherst, MA
Excel & VBA Project Apr – May 2026

- Built interactive Excel dashboard enabling comparison of **15+** U.S. cities across salary, cost of living, healthcare, and safety — designed for scenario-based decision-making.
- Engineered dynamic backend using VBA macros, pivot tables, and conditional formatting to support real-time KPI updates and data-driven resource planning visualizations.

COVID-19 Case-to-Death Analysis

Amherst, MA

Public Health Data Project

Apr – May 2026

- Analyzed **238** weeks of government-sourced COVID-19 microdata (Our World in Data) for Pakistan using Python, building 2-week lag models and OLS regression ($R^2=0.767$) to quantify the case-to-death relationship across four pandemic waves.
- Produced aggregate summary tables by wave using Python (Pandas), identifying peak case and mortality trends across population-level data to support early warning system recommendations for hospital resource planning.

Equity Analysis: Consumer Apparel & Fashion Stocks (2019–2025)

Amherst, MA

Python & Financial Analytics Project

Apr – May 2026

- Conducted full equity analysis of **five** consumer apparel and luxury fashion stocks (TPR, RL, CPRI, PVH, NKE) using Python. Pulled live market data via yfinance API, built 8+ visualizations using Matplotlib and Seaborn, and performed OLS regression analysis to quantify co-movement between sportswear and fashion equities.
- Found fashion peers share 2x stronger return correlation with each other than with Nike, confirming distinct demand drivers across apparel sub-sectors despite shared macro exposure.

Customer Segmentation

Karachi, Pakistan

Experiential Learning Project

Feb – May 2024

- Built a K-Medoids clustering model in Python across 5,448 customer records, identifying four distinct segments to enable targeted treatment opportunities and personalized marketing strategies.
- Developed interactive Power BI dashboard visualizing order metrics and discount effectiveness — translating customer data into promotional strategy recommendations for stakeholders.
- Delivered targeted marketing strategies and operational improvements per segment, directly enhancing customer engagement and loyalty outcomes.

Hotel Management System

Karachi, Pakistan

SQL & BI Project

Feb – May 2024

- Designed a database-driven system to manage hotel operations (bookings, check-ins, room service, billing) with 100 entries.
- Built normalized tables with SQL maintaining referential integrity and implemented business logic across entities.
- Created an interactive Power BI dashboard showing trends in revenue, occupancy, and staff workload.
- Translated operational data into actionable insights, simulating real-world decision-making in the hospitality business.

Mobile App – UI/UX Design

Karachi, Pakistan

Product Marketing & Design Project

Aug – Dec 2023

- Designed a fully functional mobile app prototype in Figma for an innovative startup concept, informed by insights from 5+ focus groups and feedback from 50+ individuals.
- Developed a comprehensive product marketing strategy including an App Tracking Plan alongside SEO and ASO strategies for performance monitoring and optimization.

Research report on the Halal cosmetics potential in Pakistan

Karachi, Pakistan

Methods of Business Research Project

Aug – Dec 2023

- Explored the effects of consumer perception of halal cosmetics on buying behaviour through primary research, using more than 20 existing articles for literature review.
- Gathered and analysed both quantitative and qualitative data from a purposive sample frame of 275 participants.
- Yielded valuable insights and identified key factors such as Brand loyalty, Halal certification, etc.

Top Management Insight

Karachi, Pakistan

Leadership Research Project

Aug – Dec 2021

- Conducted in-depth interviews with C-suite executives at Khaadi and EFU General Insurance, gathering insights on leadership styles, decision-making processes, and organizational culture.
- Synthesized findings into a 40-minute documentary, demonstrating strong executive communication, qualitative research, and professional storytelling skills.
